It sufficient to show that

$$|\mathcal{D} = \{ B \in S(A) : P_1(B) = P_2(B) \} = S(A).$$

THEN. We can say $D \supset L(A) = 6(A)$ and $D \supset$

$$P_1(B) = P_2(B) \otimes P_1(A) = P_2(A)$$
